

Content Delivery Networks:

Get your customers closer to you

Optimize - Transform - Deliver

CDNs work by placing **cache servers** at key access points worldwide, helping to **redirect the user to the closest possible points of presence (PoPs)**.

At Scaleflex, we check the geolocation of your company's audience and **curate the best CDN** among our **premium providers** (Akamai, Fastly, CDNetworks, Cloudfront) to ensure that you, our customers, **benefit from the very best CDN delivery**. All for the **same price!**

 Cloudimage

Cloudimage Global Networks Coverage:

 **135+**
countries

 **6**
continents

 **4,000+**
Points of Presence

Content Delivery Networks:

Get your customers closer to you

Top-tier CDN architecture:
implemented in minutes, delivered worldwide

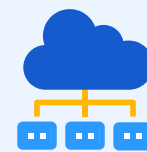

Discover the Scaleflex Difference

French SaaS, GDPR compliant, certified MACH

Time Savings

We **oversee your CDN contract**. Scaleflex manages the **entire lifecycle of media publication** and can better maintain, update, and solve issues related to **invalidation, caching and errors**.

A Granular Approach

Benefit from our granular approach instead of a one-size-fits-all solution. We help you **adapt your CDN delivery** for each project with a **specific tenant that works best for your users**.
