

# Unleash the full potential of your digital assets

Scaleflex's **Digital Asset Management (DAM)** and **Web Performance** solutions help more than 1,300 organizations worldwide store, organize, optimize and accelerate their media assets across all digital channels.

Whether it's for an e-commerce site, an ad platform, a mobile news application or institutional sites, it is now possible for developers, designers and marketers to have **a single source of truth** for all media assets.

## DAM and Web Performance for developers and marketers

### Headless and Collaborative DAM. Integrated into your ecosystem.

Filerobot allows you to store, transform and accelerate your images, videos, documents and static content, on any web and mobile application around the world.

# Filerobot: A collaborative and efficient DAM

## Upload & Store

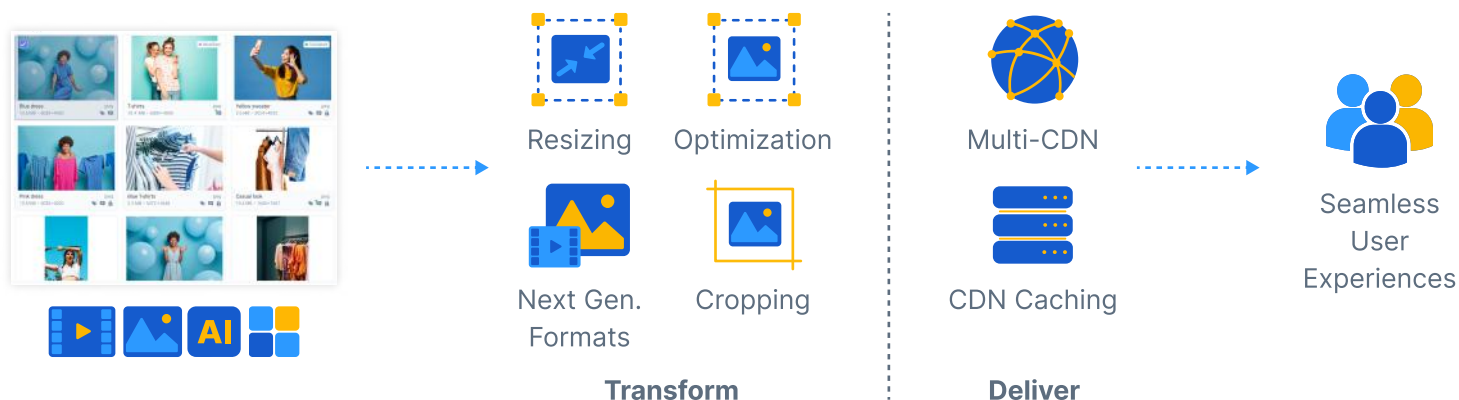

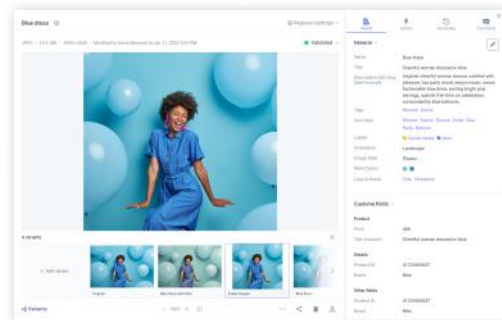

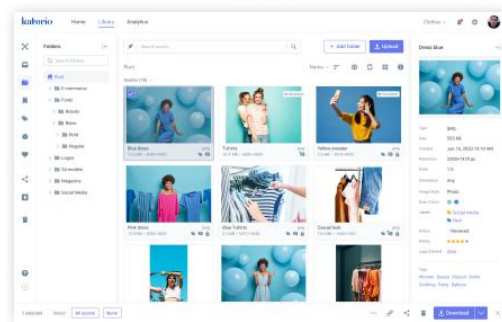

The Filerobot upload widget is a must to enable your teams to enrich your media gallery with new images, videos, CSS, JS, docs, MP4 or PDF files.

Store, search, and retrieve all your assets in your cloud library easily.

## Manage & Collaborate

With Filerobot, say goodbye to media duplicates and endless new versions. Choose if your team can upload the same content twice and send an automated alert if it already exists in the gallery.

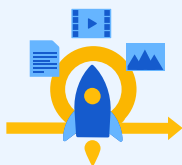

Register as many users as you want in your Filerobot account and set different permission levels for each one of them. Owner, administrator, editor or viewer? Apply different permission levels for each user, for each of your projects.

# Cloudimage: Media Acceleration and Optimization

## Scaleflex: Boost Your Content Operations and Web Performance

Our SaaS solutions facilitate collaboration among your teams within a single platform that manages the entire lifecycle of your media assets.

### Empowered Collaboration

Streamlined workflows with an accelerated media lifecycle

### Improved Conversion

Responsive assets on any devices, with better SEO & UX

### Reduced IT Costs

Save time and money on bandwidth & storage usage

Accelerate your **media assets** with Scaleflex
