

Welcome to Brand Portals!

Share branded collections of assets with access control and flexibility, giving your teams access to the assets they need!

What are portals?

Portals are easily curatable visual libraries. Add your own branding, logos, colors and user permissions! You can create unlimited portals to share on-brand digital experiences with internal and external stakeholders.

What can portals do for you?

10+

Ready-to-use templates

+7h/week

Save in manual task

30%

Faster asset retrieval

Discover the key features

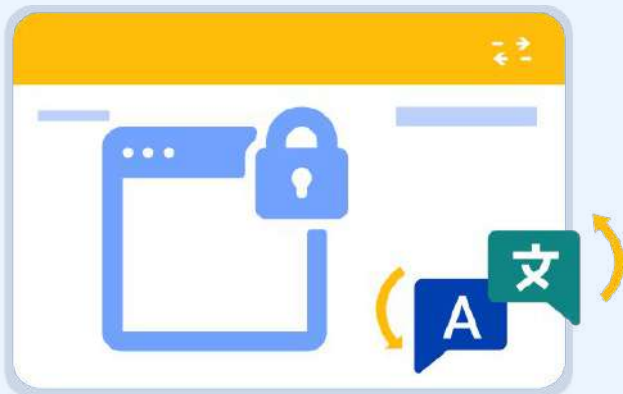

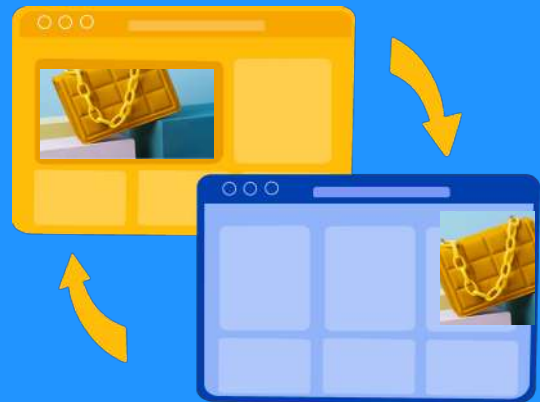

Simple to create, customize & share

Portals make asset sharing with targeted audiences a breeze. Effortlessly build stunning, branded portals with intuitive navigation without coding! Share with internal and external stakeholders.

Always up-to-date

Portals sync with the assets and information stored in the DAM, ensuring that any updates to the original files are instantly reflected in the portals.

Endless possibilities

Translate portals into any language to enable regional access; enjoy up to three security options to share your portals; customize page visibility to hide in-progress content, and much more!
